Preparation for graduate school programs in this field requires, first and foremost, that certain pre-requisite courses be completed. The checklist provided here indicates the most common requirements from a majority of schools.

- Required courses: 80% or more of schools surveyed require these courses
- Recommended courses: 50-80% of schools surveyed require these courses
- Suggested courses: less than 50% of schools surveyed require these courses or these courses are important for preparing for the Pharmacy College Admission Test (<u>PCAT</u>).
