

Office of Graduate Studies and Research
Student Research Summer Program
202

The goal of this program is to foster a community of student research and engaged scholarship during the summer months at Salisbury University. The OGS Student Research Summer Program serves all majors at Salisbury University both Graduate and Undergraduate students.

The program is funded through the Office of Graduate Studies and Research and is intended for those students with no other source of summer funding.

Proposal for Student Research Project Summer Support

The faculty member and interested student will collaboratively develop the proposal using a traditional grant format (abstract, introduction, methods, significance, budget and budget justification of supply money, and references). The proposal should be limited to 5 pages maximum excluding budget, budget justification and references and include the proposal cover sheet (see [Graduate Studies and Research](#))

Applications should also include an unofficial copy of the student's transcripts. The student must be currently enrolled at Salisbury University and be registered for the Fall 202 semester.

Student stipends for Summer 202 will be \$2,000. A limited amount of additional funding may be available for supplies. A budget justification must be provided. The sponsoring faculty member may apply for Faculty Summer Mentorship funds of \$1,000 depending on eligibility.

Participants will be expected to work on their research project 22-25 hours per week for approximately ten weeks with a minimum of 220 hours spent on this research project. Although this minimum must be met, scheduling of research will be flexible to accommodate

. The subject
